Applicator
curved tip, \varnothing 5 mm, length 336 mm
No. 20150-026

The 2,5 day TEM course is a practical hands-on course aimed at providing delegates with the technical skills to perform TEM surgery independently. In recent years, the waterjet assisted TEM-ESD has been developed and established. This state-of-the art mucosectomy technique, besides the full-thickness resection technique, will be shown and trained at this course.
